

UZ706 SERIES

High-reliability discrete products and engineering services since 1977

3 WATT ZENER DIODES

FEATURES

- Available as "HR" (high reliability) screened per MIL-PRF-19500, JANTX level. Add "HR" suffix to base part number.
- Available as non-RoHS (Sn/Pb plating), standard, and as RoHS by adding "-PBF" suffix.

| MAXIMUM RATINGS | |
|-----------------------------------|-------------------------------------|
| Zener Voltage, Vz | 6.8 to 400V |
| Continuous Current | See table |
| Surge Current (8.3 ms) | See table |
| Surge Power | See graph |
| Power | See lead temperature derating curve |
| Storage and Operating Temperature | -65 to +175°C |

ELECTRICAL CHARACTERISTICS (T_A = 25°C unless otherwise specified)

ELECTRICAL CHARACTERISTICS (T_A = 25°C unless otherwise specified)

• Specify 20% voltage tolerance by changing first numeral of type number from 7 to 9 or from 1 to 3. Specify 10% voltage tolerance by changing first numeral of type number from 7 to 8 or from 1 to 2.

⁺ All zener voltages are measured with an automated test set using a 35 ms test time.

Longer or shorter test times will have a corresponding effect on the measured value due to heating effects.

§ Zener impedance is derived from the 60-cycle AC voltage created when AC current with RMS value of 10% of DC zener test current is superimposed on the test current.

★ Maximum current based on 3 watt rating,

+ Figures shown are for a peak sinusoidal surge current of 8.3 ms duration using 60 cycle AC. The 8.3 ms square pulse rating is 71% of the value shown.
